

Physical Therapy in the Boston Shoulder Institute Clinic

Wednesday: Casey Hagan (AM), Alana Runge (PM)

Thursday: Kathy Phillips (AM), Alana Runge (PM)

Friday: Casey Hagan (AM)

Other Physical Therapists with shoulder specialization and blocked time for priority patients at the main hospital: Sara Hourihan, Michael Orpin, Laura Foley.

We also have shoulder therapists at each of our satellite clinics (Waltham, Revere, Chelsea and Charlestown) whose business cards are located in the physical therapy room in Yawkey 3G.

If you ever need help scheduling priority patients, refer them to our appointments line 617-726-2961. Our scheduling employees know to schedule these patients with one of the shoulder therapists listed above.

If you require help scheduling a patient at one of our satellite locations, the appointment phone numbers are located on the note pad in the physical therapy room on Yawkey 3G.

As always, please feel free to contact us with any questions or concerns, we are always willing to help get your patients in to therapy in a timely manner.

We are in clinic to help support Dr. Warner, Dr. Holovac and all of you. Here are some of examples as to how we can be of assistance:

- If you see a patient in clinic that is ready to begin physical therapy and is planning on coming to MGH for treatment, we can see the patient in Yawkey to begin the process or help to schedule a timely evaluation.
- If you see a patient in clinic that requires guidance in a strengthening home exercise program or early range of motion exercises after surgery, we can see the patient to help achieve these goals.
- If you see a patient in clinic who is going to be receiving physical therapy closer to home (wherever that may be), we can guide them in what to expect, and exercises to get them started. We can also help bridge communication between the therapist closer to home and all of you.
- If you have a patient in clinic who is being treated at MGH physical therapy by one of our colleagues, you can utilize us to communicate any questions or concerns you may have about these mutual patients. However, our colleagues are always available to answer any questions you may have as well.
- If you have any questions about how physical therapy might be able to assist in the care of your patients, please let us know. We are here to help!
